PRODUCTS

Maize Broken is a clean, high-energy feed ingredient made from processed maize grains. Widely used in cattle, poultry, and fish feed, it provides excellent digestibility and supports healthy growth while keeping feed formulations cost-effective.

Maize Oil Filter White is a clean, nutrient-rich maize by-product widely used in cattle and poultry feed. With 8%–10% Protein, 8%–10% Oil content, and Moisture below 10%, it supports better digestion, provides balanced energy, and enhances overall feed efficiency.

Maize Oil Filter Brown is a high-value maize by-product known for its rich nutrient profile. With 17% Protein, 18% Oil content, and Moisture below 10%, it delivers excellent energy and digestibility, making it ideal for enhancing the nutritional quality of cattle and poultry feed.
